

Deloitte Risk & Financial Advisory OTN – Test Anatomy

The Deloitte Risk & Financial Advisory OTN Test is designed to evaluate you across multiple skills, with the objective of building a fully rounded profile of your strengths and weaknesses.

TEST DURATION: 90 Minutes

NUMBER OF QUESTIONS:

- **45 questions in the Multiple-Choice Questions (MCQ) format**
- **2 questions in the Live Programming/Coding format**

PROCTORING:

This test is fully proctored using video and audio. During the test, your video and audio would be recorded and analyzed to ensure the integrity of the test.

TEST SUMMARY:

- The test is divided into four sections.
- For each section, you will get dedicated time duration (within the overall duration of the test).
- If you run out of time before completing any section, you will be moved forward to the next section automatically.
- Once you move to the section ahead, you will not be able to come back to the previous section.
- The four sections will present four different varieties of questions as explained below.

TEST SECTION DETAILS

- **General Aptitude:**
 - This section consists of 20 MCQs.
 - This section will evaluate your general cognitive skills, your reasoning skills, and ability to work with data.
 - Different questions have different Instructions, so you must read and understand the Instruction clearly for each question.
 - A few of the questions will be based on a common premise and will appear in sequence.
 - Some questions may involve basic numerical calculations, so it is advised to keep a pen and paper handy.
- **Language Skills (English):**
 - This section consists of 10 MCQs.
 - This section will evaluate your ability to understand and use English in the workplace.
 - The questions will measure your knowledge of English vocabulary, grammar, sentence construction, sentence arrangement, and overall language comprehension.
- **Technical Skills (MCQ):**
 - This section consists of 15 MCQs.
 - This section will evaluate your Computer science knowledge in the chosen areas.
 - The questions will cover three modern computer science topics – Machine Learning, Cyber Security and Cloud Computing.
- **Technical Skills (Coding):**
 - This section consists of 2 live programming questions.
 - This section will evaluate your logical thinking, problem-solving skill, knowledge of programming language(s), and your ability to write syntactically correct code.
 - You will need to write code using the provided online editor.
 - You will be able to select the programming language of your choice from the given dropdown list. This will include all the commonly used languages like C, C++, C#, Java, Python etc.
 - You will be able to evaluate your code by using the "Compile & Execute" option.
 - If the code successfully compiles, then you will be able to see how many hidden test cases your code managed to pass/fail.
 - The last version of code you submit will be considered as the final version for evaluation.
